

HST100

Hydraulic Cable Spiking Tool

MAIN FEATURES

- **Ease of use**
- **Lightweight**
- **Robust Design**
- **Portable**
- **Composite Hose**
- **30-100mm Clamping System**
- **30mm Chisel**

DESCRIPTION

Cable spiking tools are used in conjunction with cable identification systems like our CI75. After positive identification it remains necessary to spike the cable, ensuring that it is completely safe in order for work to commence. The HST100 uses a hydraulic pump and 6m composite hose between the operator and the gun. This ensures that no conductive path exists between the cable under test and the operator.

SPECIFICATIONS

Cable Size

30mm-100mm

Safety Features

Fully insulated non metallic hose
6.1m long

Power Source

700 Bar Hydraulic Pump

Cartridges

No cartridges needed

Carry Case

Steel Carry Case

Test Environment

Temperature Indoor and outdoor: 10°C to
+ 45°C.

Humidity: ≤ 85%

Accessories

Tools
Earth lead

Optional Accessories
